## **ON-Line Strategies expands consulting group**

OLS adds to its payments and compliance expertise.

**Dallas, TX, January 15, 2008:** On-Line Strategies, Inc. (OLS) announces the recent addition of David Bergert to the Payments Consulting Group as a Senior Consultant for the company.

In this position, David is to initiate a new area of consulting in audit and compliance as well as drive the completion of OLS' Visa USA Payment Applications Best Practices (PABP) compliance audit. In addition, David will assist in the company's product development efforts of OLS.Switch and OLS.Host. OLS has assisted many of their clients in achieving Payment Card Industry (PCI) security standards compliance.

David joins OLS from RSM McGladrey, Inc., where he served as a Manager in the Technology Risk Management Services group where he performed Vulnerability Assessments, Risk Assessments, SAS 70's, FFIEC IT Reviews, IT SOX, and PCI audit engagements. Prior to that role, he was Director of Technology and Product Development with Nobel Electronic Transfer, Traniva, Inc. and Comdata Processing Systems. David has over 10 years experience in the payments processing industry including design, development, and operations.

"David's outstanding experience in audit and compliance as well as his payments technology background is exactly what we need as we strengthen our consulting department as we grow," said Terry Richards, President and CEO of On-Line Strategies, Inc.

On-Line Strategies, Inc., ('OLS') is Dallas-based and specializes in providing products and services to medium and large businesses in support of their mission-critical payment systems such as automated teller networks, point-of-sale devices/networks, and third-party pharmacy networks. The company provides enterprise high performance payments software (OLS.Switch) as a in-house or out-sourced solution, strategic and technical business process consulting, 24x7x365 production support, integration of traditional and Internet-based payment solutions, and performance optimization for new and existing systems dedicated to on-line transaction processing ('OLTP').
